Christ the King Catholic School

Subject Goals

Technology

Technology provides a means of making the educational process more efficient. It provides a tool to make students more productive. It provides teachers with an additional method of instruction. It is also vital to the adequate preparation of students to today's workforce. At Christ the King Catholic School:

Students will . . .

- enable students to use technology to acquire and manipulate information
- enable students to use technology as a learning tool
- provide appropriate technologies to students at every grade level
- provide access to technologies that will help students master concepts and develop skills that will lead to improved student achievement
- provide students with the opportunity to explore and experience existing and emerging technologies
- provide up-to-date technologies in sufficient quantities for all students and staff
- provide an adequate background in technology based applications so that the student will be able to use these applications in the adult world
- provide adequate training and encouragement to allow the staff to effectively use available technologies
- integrate technology into all areas of the curriculum.
- provide students and faculty access to the resources available through the Internet
